

December 5, 2003

The Honorable Joseph E. Kernan
Governor of Indiana
206 State House
Indianapolis, Indiana 46204

Dear Governor Kernan:

The Indiana Health Facility Financing Authority is pleased to submit a report of its activities through June 30, 2003, in accordance with the requirements of IC5-1-16-35.

Respectfully submitted,

Deborah A. Sturges
Chair

c: Hon. Robert D. Garton
President Pro Tem - Senate

Hon. B. Patrick Bauer
Speaker of the House

Legislative Council

ANNUAL REPORT
INDIANA HEALTH FACILITY FINANCING AUTHORITY

JUNE 30, 2003

MEMBERS OF THE AUTHORITY

Members of the Authority are appointed by the Governor. The present members are:

Members whose terms have expired continue to serve until their successors are appointed and qualified.

AUTHORITY STAFF

Ms. Jill H. Tanner is the Authority's Executive Director. Ms. Sheryl L. Page is the Authority's full time Administrative Assistant.

THE AUTHORITY

The Authority was established by the General Assembly in 1983 enabling healthcare providers to obtain access to capital by issuing debt instruments, usually on a tax-exempt basis, thereby making healthcare available at reasonable costs to the citizens of Indiana.

Amendments to the 1983 statute extended the scope of the Authority to include brick and mortar projects for hospitals, regional blood banks, residential facilities for the developmentally disabled and related healthcare organizations.

The Authority's bonds are payable solely out of loan payments from the healthcare institutions. The bonds are not a debt, liability or moral obligation of the State of Indiana. The credit supporting the Authority bond issues is secured by insurance, letters of credit and/or the creditworthiness of the institution involved.

Interest paid on Authority bonds is generally excludable from gross income for Federal tax purposes resulting in materially lower financing costs to the borrowing institution.

THE YEARS IN PERSPECTIVE

Through 20 years of operation, the Authority has funded all activities from user fees and expects to continue user-based fees in the future.

The year ending June 30, 2003 was another excellent year for Authority financing by Indiana healthcare providers. Highlights for the year can be summarized as follows:

Special Transactions were completed in the amount of \$1,077,560,000.

The 1985A \$92,400,000 Pool was active for the year with \$22,346,000 loaned.

In the first 18 years the Authority produced \$4,600,096,955 in loans. During fiscal years 2002 and 2003, the Authority produced \$1,105,515,000 and \$1,077,560,000 in loans respectively.

Effective July 1, 2001, the Indiana Legislature amended the Authority's governing statute to allow the Authority to finance projects outside the state of Indiana under certain circumstances. In order to finance such projects, the borrower must have a substantial presence in Indiana and a substantial portion of the project being financed must be for the benefit of an Indiana healthcare provider. During the year ending June 30, 2003, the Authority completed three multi-state special transactions. The Authority believes this legislation benefits Indiana health care providers by allowing them to coordinate their multi-state financing projects through one issuer, thereby increasing efficiency and achieving substantial savings in issuance costs. The Authority expects to continue to experience a demand for multi-state transactions.

A REVIEW OF FINANCIAL ACTIVITIES

I. The 1984A issue was \$37,100,000 with a fixed loan rate of 8 3/4 percent and a maturity of December, 1990. Seven hospitals borrowed from this fund:

Bloomington Hospital	Bloomington	\$2,835,000.00
Community Hospital	Indianapolis	1,321,228.00
Dearborn County Hospital	Lawrenceburg	640,000.00
Elkhart General Hospital	Elkhart	1,007,795.00
Pulaski Memorial Hospital	Winamac	452,267.00
St. Joseph's Hospital	Huntingburg	394,019.00
Welborn Memorial Baptist Hospital	Evansville	2,835,125.00

The 1984A bond issue was paid in full on December 1, 1990.

II. The 1985A issue is \$92,400,000 (previously \$100,000,000) with a variable rate and a 30 year maturity. Sixty-two loans to thirty-six borrowers were made from this fund since 1986.

Adams County Memorial Hospital (2)	Decatur	\$ 2,500,000.00
Bartholomew County Hospital	Columbus	5,000,000.00

Cardinal Health System, Ball Memorial Hospital and Blackford Community Hospital	Various	12,500,000.00
Caylor Nickel Hospital	Bluffton	3,000,000.00
Clark Memorial Hospital	Jeffersonville	1,500,000.00

A LOOK AT THE FUTURE

The Authority continues to experience great demand, having issued approximately \$6.7 billion since its inception. It appears that demand will continue to be strong in the next fiscal year. The Authority members are grateful for the opportunity to serve so many healthcare institutions.

The Authority continues its search for new programs and activities to address the needs of access to capital for different healthcare organizations in the State of Indiana and will implement some new programs during the next fiscal year.

The Authority expects to continue to seek opportunities to participate in educational programs regarding access to capital for health care entities. In addition, the Authority continues to be an active participant in the National Council of Health Facilities Finance Authorities.

The Authority expresses its gratitude to the Governor and the Legislature for their continuing support of its activities.

Independent Accountants' Report

To Members of the
Indiana Health Facility Financing Authority
Indianapolis, Indiana

We have audited the accompanying basic financial statements of the Indiana Health Facility Financing Authority as of and for the years ended June 30, 2003 and 2002, as listed in the table of contents. These financial statements are the responsibility of the Authority's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Indiana Health Facility Financing Authority as of June 30, 2003 and 2002, and its changes in financial position and cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

The accompanying management's discussion and analysis as listed in the table of contents is not a required part of the basic financial statements but is supplementary information required by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

BKD, LLP

MANAGEMENT'S DISCUSSION AND ANALYSIS

June 30, 2003

The following discussion and analysis presents management's discussion of the financial position and the changes in financial position of the Indiana Health Facility Financing Authority (the "Authority ") during the fiscal year ended June 30, 2003. This information is being presented to provide additional information regarding the activities of the Authority and to meet the disclosure requirements of Governmental Accounting Standards Board Statement No. 34, *Basic Financial Statements - and Management's Discussion and Analysis - for State and Local Governments*. This analysis should be read in conjunction with the Independent Accountants' Report, financial statements and accompanying notes.

The Authority was created in 1983 pursuant to the provisions of Indiana Code 5-1-16 (the "Act ") and is organized and existing under and by virtue of the Act as a public body politic and corporate, not an agency of the State of Indiana, but an independent public instrumentality exercising essential public functions. Under the Act, the Authority is authorized to make loans to participating providers (as defined in the Act) in order to provide funds to finance, refinance and provide reimbursement for costs related to the acquisition, lease, construction, repair, restoration, reconditioning, refinancing, installation or housing of "health facility property (as defined in the Act). The Authority's bonds are payable solely out of loan payments from borrowers. The bonds are not a debt, liability or moral obligation of the State of Indiana. The Authority has no taxing power. The Act provides that the Authority consists of seven members appointed by the Governor of the State of Indiana. The members of the Authority appoint an executive director, who serves as an ex officio secretary of the Authority, administers, manages and directs the employees of the Authority (under the direction of the members of the Authority), approves all accounts and expenses and performs other additional duties as directed by the members of the Authority.

Financial Highlights

The assets of the Authority exceeded its liabilities at June 30, 2003, by approximately \$7.4 million (total net assets). Of this amount, just under \$1 million is restricted for debt service and approximately \$6.4 million is unrestricted. However, the Authority has designated approximately \$3.3 million of its unrestricted assets to be set aside and used for a program to support qualified borrowers who need assistance in obtaining credit enhancement. See note 1 to the financial statements.

Total net assets of the Authority increased by \$150,329 (2.06%) from fiscal year 2002 due in large part to growth in the unrestricted assets of the Authority, including investment income earned.

The total operating revenues for the Authority were \$130.6 million, which includes interest on loans of \$128.8 million, investment income of \$1.3 million, administrative fees of \$498,067, and other miscellaneous income of \$10,299.

Total operating expenses were \$130.4 million, of which \$129.1 million consists of interest paid to bondholders. Operating expenses for fiscal year 2003 were very comparable to the prior year.

Debt Administration

The Authority granted \$1,077,560,000 in designated-issue loans to health facilities during fiscal year 2003, which is the 2nd largest dollar amount of loans provided in a fiscal year since the Authority's inception, the largest amount being provided in fiscal year 2002. The total amount of debt outstanding for fiscal year 2003 was approximately \$4.5 billion, an increase of approximately \$900 million over fiscal year 2002.

Operating Analysis

The Authority's operations consist of issuing bonds and loaning the proceeds thereof to health care providers. Interest earned on those loans as well as investment earnings related to the loans represent the majority of the Authority's operating revenues.

The Authority charges administrative fees for its services. In fiscal year 2003, administrative fees collected and accrued were \$498,067, an increase of 6.3% over fiscal year 2002. The revenue from the administrative fees is used to pay for the day-to-day operations of the Authority.

Nonoperating Activities

The only nonoperating revenue shown on the Authority's financial statements is interest income earned on the investments held as part of the Authority's General Fund. These are investments which are not restricted as part of its bond issuance activities.

Economic Factors and Next Year's Activities

It is anticipated that Indiana health care providers will continue to experience capital needs for which the Authority can provide financing. If interest rates remain low or even decrease, many borrowers may choose to take advantage of the favorable market conditions and finance their capital needs sooner rather than later. In addition, some borrowers may want to refinance their higher interest rate debt. Based on current economic factors, the Authority expects to experience a steady flow of loan activity into the next fiscal year.

Requests for Information

This financial report is designed to provide a general overview of the Authority's finances. Questions concerning any of the information provided in this report should be addressed to the Indiana Health Facility Financing Authority, One American Square, Box 82075, Indianapolis, Indiana 46282.

Indiana Health Facility Financing Authority

Notes to Financial Statements

June 30, 2003 and 2002

(Table Dollar Amounts in Thousands)

Note 1: Nature of Operations and Summary of Significant Accounting Policies

Nature of Operations

The Indiana Health Facility Financing Authority (Authority), established by the 1983 Indiana General Assembly, provides financing for capital expenditures and refinancing of outstanding indebtedness for Indiana health care organizations. The Authority's bonds and notes are payable solely out of loan or lease payments from the health care organizations and the interest paid on the bonds is usually excludable from gross income for federal tax purposes, resulting in materially lower financing costs to the borrowing organizations.

The Authority has developed a number of programs to meet the divergent financial needs of Indiana health care organizations. The Authority's programs consist of tax-exempt financing for hospitals, nursing homes, blood banks, foundations, community mental health and rehabilitation facilities. Loans are granted for construction projects, equipment, remodeling, acquisitions, refinancing and, where applicable, reimbursement of prior expenditures.

The Authority has eight loan pools outstanding at June 30, 2003. Also, the Authority has assisted various health facilities in issuing designated revenue bonds and notes, the proceeds of which were used specifically by the issuing health facility.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of the revenues, expenses, gains, losses and other changes in net assets during the reporting period. Actual results could differ from those estimates.

Financial Reporting Entity

The definition of the reporting entity under Governmental Accounting Standards Board (GASB) Statement No. 14 is based primarily on the concept of financial accountability. Although the Governor appoints all of the seven Members of the Authority's governing body, neither of the other two tests of financial accountability are met. The State of Indiana is unable to impose its will on the Authority. Also, the Authority does not impose a financial burden or provide a financial benefit to the State of Indiana.

Indiana Health Facility Financing Authority

Notes to Financial Statements

June 30, 2003 and 2002

(Table Dollar Amounts in Thousands)

Measurement Focus and Basis of Accounting

The Authority is accounted for as an enterprise fund. Assets, liabilities, revenues and expenses are recognized using the economic resources measurement focus and the accrual basis of accounting. In accordance with GASB Statement No. 20, *Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities That Use Proprietary Fund Accounting*, the Authority applies all applicable GASB pronouncements. In addition, the Authority follows all Financial Accounting Standards Board (FASB) pronouncements and Accounting Principles Board (APB) opinions, issued on or before November 30, 1989, unless those pronouncements conflict with or contradict GASB pronouncements.

Cash Equivalents

For purposes of the statements of cash flows, the Authority considers all highly liquid investments (including restricted assets) with a maturity of three months or less when purchased to be cash equivalents. Cash equivalents consists primarily of money market funds.

Investments

Investments are generally stated at fair value. Money market investments and U. S. government agency obligations are carried at amortized cost because their remaining maturity at the time of purchase is one year or less. Realized and unrealized gains and losses are reflected in the statements of revenues, expenses and changes in net assets.

Provision for Loan Losses

No provision for loan losses has been made because the Authority functions as a conduit for debt financing and neither the Authority nor the State of Indiana accepts responsibility for the repayment of the obligations.

Capital Assets

Outlays for capital assets and items which substantially increase the useful lives of existing capital assets are capitalized at cost. The Authority provides for depreciation on the straight-line method at rates designed to depreciate the costs of capital assets over their estimated useful lives, which range from five to ten years.

Indiana Health Facility Financing Authority

Notes to Financial Statements

June 30, 2003 and 2002

(Table Dollar Amounts in Thousands)

Revenue and Expense Recognition

The Authority records all revenues derived from its designated-issue and 1985A bond programs as operating revenues since these revenues are generated from the Authority’s daily operations needed to carry out its statutory purpose. Investment income earned from the Authority’s General Fund investments is recorded as nonoperating revenue, while all other investment income is recorded as operating.

When both restricted and unrestricted resources are available for use, it is the Authority’s policy to use restricted resources first, then unrestricted resources as they are needed.

Net Assets

The Authority has designated a portion of its unrestricted net assets for use as a debt service reserve fund to support loans to borrowers who are unable to secure credit on their own but meet certain criteria. As of June 30, 2003, approximately \$3,300,000 is held in a separate investment account for this purpose.

Note 2: Deposits and Investments

The Authority has an investment policy that governs the investment of funds held as part of the Authority’s General Fund. Under the policy, the Authority may invest in fixed income investments and money market funds. Funds held by trustees for the Authority’s bond issues are invested in accordance with the terms of the trust indenture for the particular issue. Investments at June 30, 2003 and 2002, were comprised of the following:

	2003	2002
Money market funds	23,782	14,530
U. S. Government agency obligations	5,701	5,667

Investments not categorized

Money market funds	14,550
Guaranteed investment contracts	44,718
Total investments	64,935

Of the Authority's total cash, cash equivalents, and investments, \$72,129,090 and \$59,268,109 are required to be held in trust for repayment of debt at June 30, 2003 and 2002, respectively.

Note 3: Loans Receivable

The Authority granted \$1,077,560,000 and \$1,105,515,000 in designated-issue loans to health facilities during the years ended June 30, 2003 and 2002, respectively. Additionally, the Authority granted \$22,346,000 and \$8,000,000 from the 1985A bond issue pool during the years ended June 30, 2003 and 2002, respectively.

Indiana Health Facility Financing Authority

Notes to Financial Statements

June 30, 2003 and 2002

(Table Dollar Amounts in Thousands)

The interest rate on the 1985A revenue bonds is adjustable weekly and is determined by the bond remarketing agent. During fiscal year 2003, the rate ranged from 0.95% to 1.85% and was 1.00% at June 30, 2003. During fiscal year 2002, the rate ranged from 1.10% to 2.90% and was 1.25% at June 30, 2002. Upon election by the Authority and the satisfaction of certain conditions, the 1985A revenue bonds may be converted to a fixed interest rate.

The interest rates for all other variable rate bonds are determined by remarketing agents in accordance with applicable remarketing agreements. These remarketing agreements take into consideration several factors, including current interest rates and the financial condition of the borrower.

Prior to conversion to a fixed interest rate, registered 1985A bondholders may demand purchase of the bonds at a price equal to principal plus accrued interest. The Authority has entered into an agreement with a bond remarketing agent to arrange for the sale of the bonds which are tendered for purchase prior to maturity. However, if such bonds cannot be remarketed, the Authority has entered into a standby purchase agreement with a bank to purchase the bonds. Any bonds purchased by the bank would bear interest at the bank's prime rate and be due at the same maturity dates. The term of the standby purchase agreement extends until the earlier of the fixed rate conversion date or December 20, 2008, provided certain events of default as specified in the agreement do not occur. As of June 30, 2003 and 2002, none of these events of default had occurred and no bonds had been tendered for purchase. Certain fees to maintain the remarketing and standby purchase agreements are also required to be paid.

During 2003 and 2002, proceeds from the issuance of revenue bonds and/or other amounts received from borrowers were used to refund existing revenue bonds. These amounts were deposited into escrow accounts and invested in government obligations that will be sufficient to pay future principal maturities and accrued interest on the refunded bond issues. Accordingly, the bonds are considered defeased in the year amounts are deposited into escrow.

The following bonds were defeased during fiscal years ended June 30:

	2003	2002
Charity Obligated Group, Series 1999D	80,880	\$—
Ancilla Systems Incorporated, Series 1990A	—	7,200
Ancilla Systems Incorporated, Series 1992A and 1999B	—	15,510
Ancilla Systems Incorporated, Series 1992C	—	36,582
Ancilla Systems Incorporated, Series 1997	—	46,415
The Methodist Hospitals, Inc., Series 1992	—	11,485
Ascension Health Group, Series 1999B	—	400,000
Capital Access Designated Pool, Series 1997	—	3,000
Total	<u>80,880</u>	<u>520,192</u>

The balance of all defeased bonds that remain outstanding at June 30, 2003 and 2002 totaled \$455,650,000 and \$385,995,000, respectively.

Notes to Financial Statements
June 30, 2003 and 2002
(Table Dollar Amounts in Thousands)

Revenue bond/note debt service requirements to maturity are as follows:

	Principal	Interest
2004	124,902	138,508
2005	75,263	135,892
2006	80,315	132,952
2007	90,489	129,755
2008	91,675	126,411

2009 - 2013		578,919
	470,300	
2014 - 2018		483,542
	622,818	
2019 - 2023		368,022
	609,805	
2024 - 2028		266,920
	622,160	
2029 - 2033		125,561
	975,755	
2034 - 2038		34,347
	591,125	
2039 - 2043		776
	65,750	
Total		2,521,605
	4,420,357	

The future interest requirements for variable rate bonds are based on interest rates in effect at June 30, 2003 on the respective bond issues.

Note 5: Commitments

The Authority has also entered into various agreements relating to the administration of the bond issues as follows:

Description	Annual Fee
Remarketing agreement fee for the remarketing of 1985A bonds tendered for purchase. The agreement extends essentially to the earliest of the fixed rate conversion date or the date of payment of the 1985A bonds.	.100% of the weighted term average 1985A bonds outstanding.
Standby purchase agreement fee for the purchase of tendered 1985A bonds not remarketed. Term of the agreement extends essentially to the earliest of the fixed rate conversion date or December 20, 2008.	22 basis points of the weighted-average 1985A bonds outstanding plus accrued interest for 46 days at 20%. Additional fees would also be due should 1985A bond ratings decline.
1985A bond insurance premium. Term of insurance policy extends to December 1, 2015.	.55% of the weighted-average 1985A bonds outstanding.

(Table Dollar Amounts in Thousands)

Note 6: Deferred Compensation

The Authority participates in the State of Indiana Public Employees' Deferred Compensation Plan (Plan) established in accordance with Internal Revenue Code Section 457. The Plan, available to all State employees and employees of certain quasi-agencies and political subdivisions within the State, permits them to defer a portion of their salary until future years. The deferred compensation is not available to employees until termination, retirement, death, or unforeseeable emergency.

All amounts of compensation deferred under the Plan, all property and rights purchased with those amounts, and all income attributable to those amounts, property, or rights are (until paid or made available to the employee or other beneficiary) held for the exclusive benefit of participants of the Plan and their beneficiaries as required by section 457(g) of the Internal Revenue Code.

The State has established a deferred compensation committee that holds the fiduciary responsibility for the Plan. The committee holds the deferred amounts in a trust.

Note 7: Employee Benefits

The Authority has a defined-contribution profit-sharing plan. Contributions are at the discretion of the governing body of the Authority and are generally limited to the lesser of \$30,000 or 25% of each employee's total compensation. Employee benefit expense under this plan was \$13,741 and \$17,607 for 2003 and 2002, respectively.
